

Portable Electronic Control Box (PECB) with Tracking Software

Overview

The PECB with Tracking Software is a versatile portable lock box powered by TS-TEK's RxSystems web-based application. Designed for LTC pharmacies, the lock box secures the medications every step of the way from the pharmacy to the facility to the patient, not just at the point of dispensing.

Lock Box Features

- Electronic Keypad Lock (requires 2-AAA batteries included) and has a low battery alarm feature.
- Safety backup key override lock comes standard on all units and is supplied with two metal keys.
- Standard with two ¼-20 flat head screw mounting holes in the back panel for a permanent mount (Screws not included).
- White PVC High-Density Polyethylene (HDPE)
- Approximate dimensions: 7.5"W x 8"H x 14"D
- Approximate weight: 4.25 lbs.

Tracking Software Features

- Captures medication inventory at all times.
- Provides a step-by-step tracking of dispensed drugs.
- Captures required prescription information.
- Ensures accurate medication dispensing.
- Designed to support 1,000 to 50,000 beds in a facility.
