

# Tall Wall Mounted Locking Cabinet

## Overview

The Tall Wall Mounted Locking Cabinet is the ideal keyless electronic medical locking cabinet to secure medications & other critical items in healthcare and hospitals, where you have limited flat surfaces to mount the locking cabinet or if you prefer the convenience of a wall-mounted locking cabinet.

## Features

- Electronic Keypad Lock (requires 2-AAA batteries included) and has a low battery alarm feature.
- Safety backup key override lock comes standard on all units and is supplied with two metal keys.
- Standard with two ¼-20 flat head screw mounting holes in the back panel for a permanent mount (Screws not included).
- White PVC construction cabinet.
- Exterior dimensions: 14"W x 22.75"H x 4.25"D
- Approximate weight: 14 lbs.

Increase Safety & Infection Control

Improve Compliance

Secure Medications

Increase Efficiency

Cost-Effective & Reduce Waste

## Customizations

### Door

**Clear Door**  
for ease of visibility.

**Frosted Door**  
for HIPAA compliance.

**White Door**  
for privacy.

**Wood Grain Door**  
for a homey look.

### Lock

**Self-Locking Lock**  
Standard, self-locking lock automatically locks the box when the door is closed.

**Manual Shared Use Lock**  
This lock allows for a revolving use code and requires the lock knob to be rotated to the locked/unlocked position.

**Audit Trail Lock**  
Provides a time and date stamp record of access for up to 20 different user codes.
